RE: Certification of Conformance and Delivery for SS-2 Rapid Go

To Whom it May Concern:

This document has been drafted to provide certification as to the origin, properties and delivery of SS-2 Rapid Go, an Erosion Control Blanket (ECB). SS-2 Rapid Go is produced by Western Excelsior Corporation (WEC). The material is produced in the United States. Each roll is subjected to regular inspection and testing in accordance with the WEC Quality Assurance Program. Properties and specifications of the material are provided on document number WG_MPDS_SS-2RG, attached as reference. Installation documentation may be found at www.westernexcelsior.com.

Since most WEC products are sold to distributors and stocked, WEC is typically unable to certify material type or quantity delivered to the project/project site. However, space is provided below for distributor/contractor certification of materials delivered to the project/project site.

To the best of our knowledge, the information included is accurate.

A handwritten signature in black ink, appearing to read "Jill Pack", is written over a horizontal line.

Jill Pack, CPESC
Product Manager

Standard Material Delivery Certification
